REMINDER

Woolclasser Code of Practice Review

Industry stakeholders are reminded that AWEX, through the Industry Services Advisory Committee (ISAC), is undertaking a review of the Code of Practice (COP) - *Preparation of Australian Wool Clips: The Woolclasser*. This triennial review, which will result in the 2010-2012 edition of the COP coincides with the re-registration of woolclassers in December 2009.

The standard of wool preparation contributes to the reputation of the Australian Wool clip. To maintain this reputation, it is important that the Australian wool industry has a set of standards and rules that meet the needs of growers and processors alike. Clip preparation is the first step in the processing pipeline.

AWEX invites written submissions from industry on any aspect of the Woolclasser Code of Practice. When making a submission, please include with each topic, the reason(s) why this matter should be considered. Suggestions on how the issue might be addressed are also welcome.

For convenience a standard COP feedback form is attached. AWEX contact details are provided at the bottom of this page.

All submissions must include the name and address of the author/organisation and must be lodged in writing with AWEX by close of business on FRIDAY 19TH DECEMBER 2008. Emails are acceptable.

Mark Grave
Chief Executive Officer
