AWEX launches online learning hub to support WoolClip users

New online hub brings together practical guides, instructional videos and training updates to help WoolClip users build confidence and skills.

AWEX has launched the **WoolClip Online Training Hub**, a new online resource providing practical guidance to help Wool Classers and growers use WoolClip with confidence.

The hub brings together easy-to-follow, topic-based guides and instructional videos for new and experienced users of the WoolClip web and mobile applications. Resources cover key functions, including scanning eBales (eBIDs), and allow users to find answers to common questions or learn at their own pace.

AWEX WoolClip Program Lead John Cox said the hub was developed to make practical support more accessible to wool industry users.

“We saw a need for easily accessible resources to support Wool Classers and growers using WoolClip. The hub brings together guides and videos to help users with quick questions, as well as those who want to learn at their own pace how to set up and use WoolClip,” John said.

“Users can also find information about upcoming training events and keep up to date with new features and releases.”

The hub complements the existing WoolClip training site, where users can practise using the platform.

Visit learn.woolclip.com.au to explore the WoolClip Online Training Hub, or training.woolclip.com.au to practise using WoolClip.
